

To: Chairman and members,
Delta Protection Commission

FOR THE RECORD

Comments from the public:

Ernst report #12 to the Delta Protection Commission

November 18, 1993

Sirs:

Do any of you here have a copy of the 1849 California Republic Constitution? I've heard that since the 1879 "new" Constitution this state has been a corporation.

How many here have a manufacturer's certificate of delivery for your pickup, truck or automobile? I don't! Wouldn't that establish actual ownership? Who has it?

Most of us in this room own some land, even if only the parcel on which a house is located. Has anyone here secured your property with a land patent? There are those who assert this helps against a variety of government land grabs, eg IRS, "wetlands" encroachments. Getting a patent on your land? I'm not a lawyer. I got the assessor's property description and its Diablo bench mark coordinates, then went to Sacramento BLM for a copy of the original patent and map. That's where I started.

WHAT'S THE POINT OF THIS? You here are engaging in activities to subvert our California and Federal Constitutions re representative, jurisdictional, elected governance. It is therefore unlikely many of you have gone ahead to protect yourself when this whole can of Delta worms comes tumbling down on individuals here.

NAFTA AND "DELTA PROTECTION"

NAFTA is merely the start of the Western Hemisphere portion of the Trilateral World Government. A new legal system; deactivated, circumvented Constitutional protections; selective, arbitrary, capricious, new, termite written "environmental" code enforcements directed against politically incorrect. You here are engaged in an activity which is complementary to that, albeit on a local, small scale; ie the disruption of private property rights of owners via the disabling and deactivation of the authority of elected jurisdictional representation.

Have you heard yet today about the Congressman charging "TREASON!" against those voting passage of NAFTA?

It is time to recall the old U S A adage: "It is not the function of the government to keep the citizen from falling into error. It is the function of the citizen to keep the government from falling into error."

The Advisory Commission reports coming up in the near future? Very few if any of you will read them, let alone be permitted to study them before being cajoled into passing "laws" based on them. Your staff will read them. They may even import the prewritten copy via modem from another source for initial handout to those Advisory Committees. That's the way Vallejo City Council Zoning Ordinance got rewritten 15 years ago. That is essentially the way the San Francisco Estuary Project master plan was composed.

Remember the San Francisco Estuary Project and its "Comprehensive Conservation Management Plan"? That was prewritten before ever its Management Committee even convened. How much was that prewritten Comprehensive Plan changed over the two years its 50 plus members met? Almost NO NONE! The "Consensus Process" some of you here participated in then took care of that. Then those same Management Comm people signed that Master Plan as if they were its writers. Doing what it took to keep their jobs? At what price to the citizen?

That SFEP Management Plan is the master plan for the ultimate document you will be required to approve (also sign?) down the road. This "Delta Protection" piece of regional government is an integral part of the implementation of SFEP. AND SFEP is a vital part in the "international flyway" portion of NAFTA and its upcoming successor the "Western Hemisphere Free Trade Agreement", "WHEFTA".

Where does your Oath of Office fit into this, "... to protect and defend the (two Constitutions) ... without mental reservation or purpose of evasion ..."?

Respectfully,

Franklin H "Doc" Ernst Jr
